

"ADOPT-A-FRIEND" AT ELACHEE

Did you know that at Elachee Nature Science Center there are over 30 different animals and reptiles living in natural habitats? The collection includes two Gopher Tortoises, which are the state reptile of Georgia, and two rescued Red-Tailed Hawks who now live happily in our woods habitat, plus many other reptiles and amphibians. This collection of animals is used in our educational programs for children, and is also part of our museum exhibit.

Many of our members and friends have asked to be more involved with the animals, so now you and your child, a special friend, or special grandchild are invited to "Adopt-A-Friend" for one year. You may choose from our list of live animals, with adoption prices based on the amount of food, care, and attention each animal requires. Once your new friend has been chosen, you will receive a gift bag with all of the following:

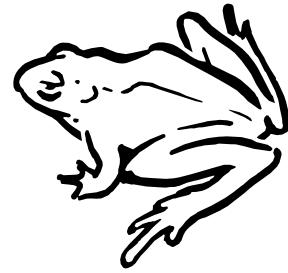

- An adoption certificate
- A picture of the animal
- Information about living and eating habits
- Themed goodies for you to keep
- A free pass to visit your new friend

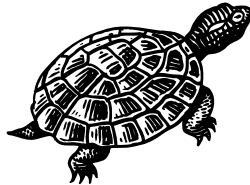

A name plate will be placed by the animal's home with your name. Each adoption is valid for one year.

Animal adoption is the perfect gift for your child to give in honor of a special teacher, for any science professional, to a scout leader from a den, pack or troop, to a 4-H leader for their dedication, or to anyone who appreciates the wonderful creatures that live in our world! Call for more information at 770-535-1976.

More than one budding naturalist in the family? Adopt both Red-Tailed Hawks, or both male and female Corn Snakes!
