

# Gardening for Birds

You can provide a great habitat for Georgia's resident birds and migratory species, just by planting a few native plants! Not only do these plants provide beautiful color and foliage, but they also attract many different bird species to your yard by providing them food!

## **Native tree, vine, and shrub fruit producers:**

Red Mulberry  
Flowering Dogwood  
Serviceberry  
Blackgum  
Black Chery  
Sugarberry  
Southern Magnolia
